

In the Specification:

Please replace the last paragraph on page 5 as follows:

Referring first to FIG. 1 a reel 1 has a base 4 which is preferably bolted onto the top of the tank as seen in FIG. 3. The spool 5 of the reel 1 receives a 480/30 flat braided copper wire 2 or any wire which offers a very low impedance to a lightning strike. A housing 3 covers a coil spring ~~31~~<sup>39</sup> which constantly pulls on the wire 2 to keep out the slack.
